I'm a designer+developer.

I've been designing, developing, and managing digital products for **20+ years**.

I have a wide range of digital product experience. My design work is focused on **UI/UX/IxD** while my development work is focused on **design engineering** and **web app development**. I have been exclusively working on **0→1 consumer AI products** for the last 7 years, the last 4 also in leadership roles managing engineering teams.

I am currently looking for a **frontend-focused EM (hands-on) or IC role** that offers substantial responsibility, ownership, and creative freedom to **ideate → plan → implement → measure → iterate → make an impact**.

know-how

Experience in managing product engineering teams
Technical knowledge to create scalable software systems
Proficiency in writing reusable and performant code
Expertise on user experience design and user research
Understanding of design principles and Gestalt theory
Strong recognition of visual identity

analytical skills

Design-oriented problem solving
Creative ideation and conceptualization
Balancing form and function on any given matter
Developing models with contextual and visual coherence
Discriminative and comparative case study and analysis
Data-driven decision making and product analytics

design skills

Tools: Sketch, Figma, Photoshop, Illustrator
Web design: Mobile-first, cross-browser compatibility
UX: Usability, wireframing, storyboarding, accessibility
UI: Prototyping, design systems, interaction design
Other: Branding, print design, web animations

development skills

AI: LLMs, Agents, Workflows, Orchestration, Monitoring
Web: JavaScript, TypeScript, React, Web APIs, DOM, HTML, CSS, Sass, Tailwind, Node, GraphQL, REST
Mobile: React Native, Expo, SwiftUI
Tooling: Vite, Webpack, DevTools, CLIs, SDKs, Git

work

aiXplain

- **Head of Engineering** 📍 SAN JOSE (HYBRID)
NOVEMBER 2024 – PRESENT
Managed engineering teams (frontend, backend, and DevOp/MLOps). Designed and developed the next generation of the product suite: Studio (no-code agent builder), Store (marketplace for agentic AI applications), and Console (account hub).
- **Head of Engineering, UX** 📍 SAN JOSE (HYBRID)
MARCH 2023 – NOVEMBER 2024
Managed UX team, a hybrid of product and frontend teams. Designed and developed Bel Esprit, the AI assistant that plans, builds, and auto-deploys AI pipelines.
- **Frontend Team Lead** 📍 LOS GATOS (REMOTE)
FEBRUARY 2022 – MARCH 2023
Managed frontend team. Designed and developed the no-code product suite: Discover (AI asset marketplace), Benchmark (model evaluation), FineTune (model fine-tuning), Design (AI pipeline builder), AutoMode (model ensembler).

Validato

Senior Frontend Engineer + Designer

 LONDON (REMOTE)

NOVEMBER 2020 – FEBRUARY 2022

Hired to work on a highly complex cybersecurity breach and attack simulator AI product. Designed and developed customer-facing web application, and also its admin panel and the email alert system.

Base64.ai

Senior Full-Stack Engineer + Designer

 EMPLOYEE #1  NEW YORK (REMOTE)

JANUARY 2020 – APRIL 2020

Hired to develop a document understanding AI product. Worked on the data extraction technology and its API on the backend. Designed and developed customer-facing web application, and also its mobile applications for both Android and iOS platforms.

Docu.ai

Senior Full-Stack Engineer + Designer

 EMPLOYEE #1  SAN FRANCISCO (REMOTE)

APRIL 2019 – JANUARY 2020

Hired to develop an OCR-based document classification and data extraction AI product. Designed and developed customer-facing web application, and also tools for mass document processing, data correction, and dataset creation+management.

Grou.ps

Senior Full-Stack Engineer + Designer

 COFOUNDER (GRAPHJS)  RENO (REMOTE)

FEBRUARY 2018 – APRIL 2019

Hired to develop GraphJS, a client-side library for enabling social features (messaging, following, etc.) on any website. Designed and developed it in its entirety, and also the customer-facing web application to create, edit, customize all social components.

Semantica

CEO + CTO

 FOUNDER  SAN FRANCISCO (ONSITE)

DECEMBER 2013 – APRIL 2016

Founded the company to create better social feedback tools. Hired and managed a team of four after my startup raised a seed investment. Designed, developed, and shipped three products called Piccture, Cardz, and Favogue.

Freelance (and earlier employment)

Designer + Developer

JUNE 2003 – FEBRUARY 2022

Helped 50+ clients make their product amazing. Most of my major clients also chose to work with me on their rebranding.
